

## Zero Puddle Silicone Inserts

In our continued pursuit for product line improvement, we are expanding the drainable riser inserts (Zero Puddle) to support tube sizes. The migration to all tube sizes will be phased in over the next few months. Pipe sizes are the next target.

### Drainable Riser Hangers

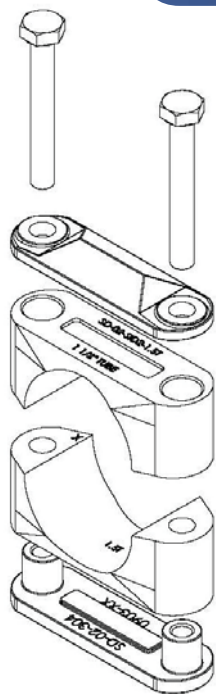

When supporting riser (vertical) lines, the insert's sloped sides eliminates flat surfaces. This attribute facilitates the hanger's drainability and cleanability. Available on CSH style hangers.

#### Supported Line Types

- Stainless Steel OD Tube (Blue two Piece Insert)\*
- PVC Coated Electrical Conduit (Black One Piece "Uni-Hinge" Insert)
- Electrical Metallic Tubing (EMT) (Light Gray One Piece "Uni-Hinge" Insert)

\* The two piece insert's design aids installers while sliding long sections of tube into position.

Uni-Hinge
