

## BENEFITS OF HANGERS ENCASED BY THE INSULATION PROTECTING PVC JACKET

Syntiro's Reduced Size Hanger has been Encased by the Insulation Protecting PVC Jacket

Insulation Envelope "IE"

### ENCASED HANGER BENEFITS

- Syntiro's reduced size hanger allows the protecting PVC jacket to encase its housing.
- Insulation broken by larger hangers require end caps on each side of the hanger.
- To create a positive vapor seal, end caps must be glued to the PVC jacket and the pipe.
- Broken insulation, by larger hangers, costs as much as \$10.00 in labor and material per break.
- An uninterrupted PVC jacket helps create a positive vapor barrier, eliminating the potential for ambients contacting and degrading the insulation.

Grp	Line Size	Line OD	Hanger Dims			"IE"
