ZERO CAULK SPACERS - ZCS Series

Eliminates Caulk

MOUNTING:

- Blindside Walls - Insulated metal panels imp's, square tubes, framing... use jack nut/rivet nut
- Openside Walls - Cleanroom Wall Panels, Gypsum Board, Beams, Plates, Cement... use backside backing plate with lock nuts

APPLICATIONS:

- Cleanrooms and mechanical areas, including but not limited to the biotech, pharmaceutical, food processing, beverage, dairy, cosmetic, chemical, water treatment, and semiconductor industries.
- Low flow & low pressure systems with moderate vibration: WFI, SIP, CIP, process, utility & instrument lines, WFI, SIP, CIP, process, utilities & instrument lines

SIZES:

- Support Range: 1/4" - 2" Tube and 1/2" - 1 1/2" Pipe for Copper and PVC Coated Pipe and EMT Conduit
- Tight fit Anchors and loose fit Guides are offered in CSD Series

MATERIALS:

- 304 and 316 stainless steels – for 316, replace 304 with 316 in the part number
- FDA grade Silicone Rubber Gaskets with Silver ion additive

FEATURES:

- Silicone Rubber Plug/Gasket creates a drainable and cleanable seal to surface
- Silicone Rubber Plug/Gasket eliminates the use of caulk - caulk will breakdown over time creating voids
- Silver ion additive is blended in the FDA grade Silicone Rubber Gaskets, impeding bacterial, mold, fungus from forming on the gasket
- Jack Nut's tensile strengths are over 820 pounds
- No exposed threads or openings

GRAPHICS: A FEW MINUTES PROCESS

    A.   Stock and actuated Rivet Nut

    1.   Drill 7/16" hole into IMP

    2.   Rivet nut placed in hole

    3.   Rivet nut actuated and secured to IMP via MARSON, M39043 MJN-2 JACK NUT INSERT TOOL
